

STATEMENT OF COMPLIANCE

Dear Partners,

Shelly Europe Ltd. (or the „Company“) as the manufacturer of smart devices with trademarks „Shelly“ and „Loqed“ is committed to ensuring that the packaging used for its products complies with *Regulation (EU) 2025/40 on packaging and packaging waste* (the „Regulation“ or „PPWR“).

The PPWR applies to packaging placed on the EU market from 12 August 2026.

Notwithstanding the above, the Company in its capacity as a manufacturer within the meaning of Art. 21 of the Regulation undertakes to provide declarations of conformity under the PPWR and for the packaging of products currently in the EU retail and warehouse network.

For each individual type of product packaging, a separate declaration shall be issued, specifying the specific category of packaging, the type of use (single-use or reusable), the dimensions, the components of the packaging and the material from which they are made, as well as the total weight (gross). The Company reserves the right to issue declarations covering several types of packaging as a group, provided that the relevant declaration specifies an individual identifier for each type included in the group.

The Company's product packaging is not tested for the presence of per- and polyfluoroalkyl substances („PFAS“) under Art. 5, para. 5 of the PPWR, insofar as this requirement applies only to packaging intended to come into contact with food, which the Company's current packaging is not.

Based on the available information provided by the Company's suppliers of packaging materials and packaging, the packaging components comply with the applicable requirements regarding restricted substances, including heavy metals (Pb, Cd, Hg and Cr).

The assessment of the packaging, on the basis of which the PPWR model declarations are issued, is carried out in accordance with the standard conformity assessment procedure (Module A — internal production control, as set out in Annex VII to Regulation (EU) 2025/40), without the involvement of a notified body.

Shelly Europe Ltd. is registered under the EPR scheme(s) for packaging waste in the relevant Member State(s), with valid contract(s) with the applicable recovery organisation(s) pursuant to Art. 44–45 of the Regulation. The Company additionally holds ISO 14001:2015 certification for its environmental management system.

We appreciate Your business and remain committed to PPWR compliant packaging, so You and Your customers can continue to rely on safe, high-quality intelligent solutions.

Sofia, Republic of Bulgaria
